

MUTHAMIL EDUCATION and RURAL DEVELOPMENT SOCIETY

Annual Report – BENG PROJECTS - 2023 April to March 2024.

CHAPTER- 1: DROP OUT CENTRE

The DOC Children enjoying study and learning cultural habits in our Centre. The boys and girls from our DOC are getting good knowledge on their school subjects. The subjects like English, Mathematics, Science, and Commerce are tough for our children. But our teachers are able to explain them step by step and made them to understand easily. There are group discussions on the subjects and the children are getting chances to read and write the answers on the black board. Our teachers conduct monthly tests on the school subjects and make the students to get rid of fear during school final examinations.

We provide special classes to the 10th, 11th and 12th students during their final government examinations and all the 23 students have passed the final examinations and now continue their higher studies. Week end classes were conducted and the students were encouraged to get special food and snacks during the course of training. The parents were very happy and conveyed their gratitude to our organization. We submit the same to BENG for the timely help and guidance provided for these children.

The last year students who passed 12th standard are as follows.

She lives in Natham koilpatty , along with her parents in a small house. She passed her 12th standard from government girls higher secondary school, Natham. She took 387/600 on her final examinations. She studied Commerce, arts and computer course at her school in 12th standard. At present she is studying B.COM.CA, (Bachelor of commerce and computer application) at Sacred heart college, Dindigul. It is a 3-year course and hence she has to study from 2023-24 to 2025-26. She wants to become a bank manager in future. She loves music and dancing. She is one of our DOC children. During weekends she goes for selling vegetables in the market shop. She is hard working and showing interest to earn money in future in order to help her poor parents. She deserves the BENG scholarship of 17000 Rupees for three years.

Santhiya

Date of birth: 28.12.2005, 17 years old

Father name: Krishnamoorthy (daily agricultural wage worker)

Mother Name: Laksmi (daily agricultural wage worker)

Siblings: 1. Arunpandi (Elder brother) studying B.COM at Madurai.

Santhiya had passed 12 th standard and scored 526/600 marks in the final examination. She studied commerce and accountancy on her 12 th standard. At present she is studying Bachelor of commerce and computer application at NPR college, Natham. The course of study period is 3 years. (2023-24 to 2025-26).

She is living in a small village called veerappanayalkkanpatty, Natham taluk, Dindigul District, Tamilnadu, India. She lives in a small house along with her parents. The family work hard for their livelihood and daily routines. The family is very poor to pay for her study and requested us for the scholarship. She deserved for the scholarship of 17000 every year since 2023-24.

She is interested on growing pet animals and she has a small dog. She likes music and enjoy Television during weekends. She wants to become a teacher in commerce in future.

MICRO CREDIT (Livelihood Development Project)

1. Palm leaf project period is April 2022 – November 2023.

Each member was given Rs 10000 and 15 women beneficiaries were engaged in the activity. Hence $15 \text{ members} \times \text{Rs } 10000 = 150000$ was the loan amount. The loan amount was repaid sharply by the women members on November 2023.

The project statistics: Each woman can produce 50 small palm leaves daily and the average working days are 20 in a month. Hence one woman can work as follows:

$50 \text{ mats} \times 20 \text{ days} \times 6 \text{ Rs sale cost of 1 mate} = \text{RS } 6000$ Income per month.

Cost of Rawmaterial (leaf) = $1 \text{ leaf} \times \text{Rs } 1 \times 50 \text{ leaf} \times 20 \text{ days} = \text{Rs } 1000$

Transport expenses Rs 700

Loan repayment Rs = 550,

Hence Rs 550 + Rs1000+ 700 =**Rs 2250** (total expenses)

Hence the amount in hand per month per women will be Rs 6000- Rs2250= **Rs 3750**

The women manage their family using this income and send their children to schools regularly. This project helps them to feed their family and keep the livelihood punctual. They work hard and lead their family without hurdles. They feel happy with this income and the life status is fit to live.

2. Cow project period is June 2022- November 2024.

The cow loan Rs 50000 was given to 5 women for a period of 30 months. Almost 18 months repayments have been paid so far. The total loan is Rs 250000. Repayment made in 18 months is Rs 154530. Remaining Rs 103020 will be paid in another 12 months (November 2024).

The women working statistics:

Women work hard to maintain their cow and feed them properly. They arrange proper insemination and treatments with the help of veterinarian. The cow and calves are safe and the milk yield is also normal. Every day the milk yield is 3+ 4 litres = 7 litres .

7 litres x Rs 30 X 30 days = **Rs 6300** (income per month)

Loan repayment for 1 month = Rs 1700

Cow Feed cost for 1 month = Rs 1500

Veterinarian cost for 1 month = Rs 100

Total Expenses = Rs 1700 + Rs 1500+ Rs 100 = **Rs 3300**

Hence the money in hand per month will be with a woman = Rs 6300 - Rs 3300 = **Rs 3000**

The women keeping their cow very well and earn money through selling the milk. The milk yield is regular but the cost of the milk marketed is not so high. However the marketer buys the milk on their door steps. Hence the women need not take risk to travel and sell the milk. The milk vendor reaches the women's home daily both in morning and evening to market the milk. The women need to take the cows for grazing in the grass fields regularly. Besides they have to buy the dry feed for the cows every month. However they get regular life status using the cow income and send their children to schools regularly. Their livelihood also settled and the family enjoys normal life accordingly.

Women entrepreneur Livelihood Development Project

The project period is April 2023- November 2023.

The women who are engaging in small business venture were selected for the project. Actually, there are 39 women who are living in a small village area around Dindigul are the beneficiaries and they belong to the marginalized community. They are disadvantaged and helpless to undertake their ventures. They know the skill very well and they are waiting for the marginal money to start up the business. All women are engaging in different business like idly shop, dosa shop, bakery, petty shop, vegetable selling, onion selling, goat rearing, cow keeping, bangles selling etc. Each woman is hard working and they sell the products successfully according to the market rates. They plan and execute the business in a success model. All family members collaborate with them on the business. Our project directly helps the women through micro credit. The middle men and money lenders were completely avoided because of our project help.

We hope this project will make them happy and provide way to attain sustainable life status soon. They work hard and reap the benefits. Actually, all the 39 women were given Rs 10000 each and they repaid the money with in the stipulated period. (39 women x Rs10000= Rs 390000).

Hence our plan is to provide Rs 10000 to 55 women at the end of December to make them viable to continue their small business and to attain sustainability for their livelihood.

Word of thanks: We thank BENG, Netherlands for the immense help and guidance they made on increasing the life standard of the people and community. The women and children enjoying their rights and responsibility due to BENG projects. The livelihood support is wonderful and pave way to attain sustainability on their life status.
